CHAPTER FIVE

Capital Improvement Program Budget:

Capital Improvement Program 1

DATE: May 21, 2014

TO: Board of Directors
Department Supervisors
District Staff

SUBJECT: Transmittal of Final Budget Document for Fiscal Year 2015

I am pleased to present the Fiscal Year 2015 Operating and Capital Improvement Budget for the Yucaipa Valley Water District. This document has been developed as a monetary statement of not only the programs and goals for the coming year, but also as a document that reflects the priorities of providing high quality and reliable service to the community we serve.

The Fiscal Year 2015 Operating and Capital Improvement Budget has been developed based on projections of a slow-moving economy which is expected to result in very little new development coupled with various increased operational costs. The current economic conditions require the District to focus on essential operational duties and maintenance tasks while activating the newly constructed salinity management and recycled water projects.

The attached balanced budget provides for quality water, sewer and recycled water services while effectively utilizing our available resources. The fiscally conservative approach to this budget will allow the District to continue as a leader in our industry while acknowledging our customer's needs and the overall condition of the economy.

The goals established within this budget are not attainable without the dedicated support of the Board of Directors and the professional staff members that continuously focus on improving the quality of life within our community. As always, I sincerely appreciate your hard work and commitment to the District.

Respectfully,

Joseph B. Zoba, General Manager

Chapter One

Fiscal Year 2015

Operating Budget Overview

Introduction

The Yucaipa Valley Water District is made up of a proactive and diverse group of elected officials and employees dedicated to providing reliable water and wastewater service in an efficient, cost effective manner that provides a high level of customer satisfaction. On May 1, 2002, the Board of Directors adopted the following mission statement to clearly reflect the vision and principles that guide the dedicated elected officials and employees of the District.

Yucaipa Valley Water District is committed to professionally managing the precious potable drinking water, sewer and non-potable water resources of the Yucaipa Valley in a reliable, efficient and cost effective manner in order to provide the finest service to our customers, both present and future.

We are entrusted to serve the public for the benefit of the community.

We believe in responsive, innovative and aggressive service, and take pride in getting the job done right the first time.

We encourage a work environment that fosters professionalism, creativity, teamwork and personal accountability.

We treat our customers and one another with fairness, dignity, respect and compassion and exhibit the utmost integrity in all we do.

We believe in enhancing the environment by following a general philosophy of eliminating waste and maximizing recycling and reuse of our natural resources.

We are committed to using the following operating principles as a guide to accomplishing our mission:

- We are proactive in our approach to issues.
- We are committed to integrity and consistently high ethical standards in all our business dealings.
- We use the strategic planning process to focus our efforts and minimize our crisis management mode.
- We make informed, rational and objective decisions.
- We aggressively pursue technological solutions to improve operations.
- We are inclusive in our decision making and delegate responsibility whenever possible.
- We design our services around customer wants and needs to the degree possible within our financial and regulatory constraints.
- We cultivate widespread commitment to common goals.

We believe our success depends on every employee knowing and sharing these values and principles

This Operational Budget and Capital Improvement Program has been prepared with the District's mission statement in mind to link the financial health of the District with our commitment to professionally manage the precious water, sewer and recycled water resources of the Yucaipa Valley in a reliable, efficient and cost effective manner in order to provide the finest service to our customers, both present and future.

To meet the mission of the District, the Board of Directors and staff members continue to proactively focus on water quality issues, water supply issues, infrastructure deficiencies, maintenance of existing systems and compliance with increasingly stringent regulatory requirements.

Overview of the Yucaipa Valley Water District

The Yucaipa Valley Water District was formed as part of reorganization, pursuant to the Reorganization Act of 1965, being Division I of Title 6 of the Government Code of the State of California. This reorganization consisted of the formation of the District, dissolution of the Calimesa Water District and formation of Improvement District No. 1 of the District as successor-in-interest, and dissolution of Improvement District "A" of the San Bernardino Valley Municipal Water District and the formation of Improvement District "A" of the District as successor-in-interest. On September 14, 1971, the Secretary of State of the State of California certified and declared formation of the Yucaipa Valley County Water District. The District operates under the County Water District Law, being Division 12 of the State of California Water Code (the "Act"). Although the immediate function of the District was to provide water service, the District has assumed responsibility for providing recycled water and wastewater service in Yucaipa Valley.

The District is located about 70 miles east of Los Angeles and 20 miles southeast of San Bernardino in the foothills of the San Bernardino Mountains and has a population of approximately 44,426. The District is situated in both San Bernardino County and Riverside County.

Land Use within the District

The altitude of the District rises from about 2,000 feet above sea level at the western end of the valley to about 5,000 feet at the eastern end, with average elevation of roughly 2,650 feet. The topography of the area is characterized by rolling hills separated by deeply entrenched stream beds, namely, the Yucaipa and Wilson Creeks. The District includes the incorporated cities of Yucaipa and Calimesa which are in San Bernardino and Riverside Counties respectively.

The District projects that the undeveloped land within its boundaries will continue to be developed consistent with the general plans as provided by the City of Yucaipa and the City of Calimesa. The projected population of the District in the year 2060 will be approximately 94,800, which reflects build-out of the City of Calimesa and the Oak Valley development. Although approximately 49.8% of the land within the boundaries of the District is currently undeveloped, less than 1% of District water sales are to agricultural water users.

Governance and Management

The District is governed by a 5-member board of directors (the "Board"), the members of which are elected from five separate divisions of the District for staggered 4-year terms.

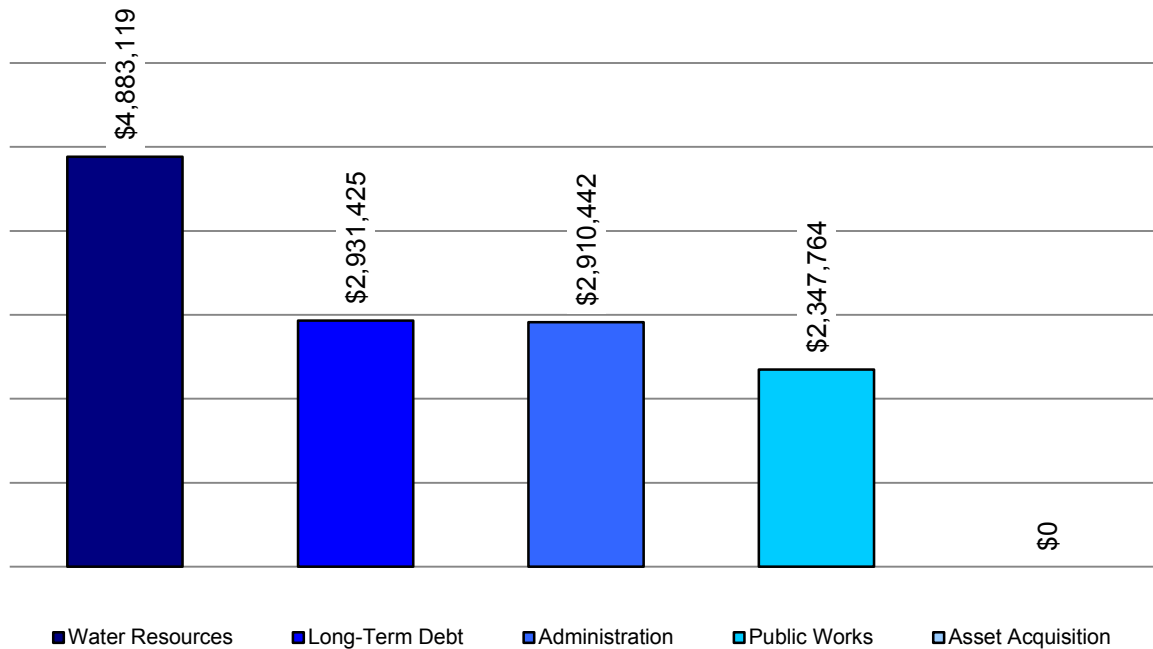

Budget Overview

The Fiscal Year 2015 operating budget totals \$25,195,250 (excluding capital improvement projects) distinguished by the following three enterprise funds.

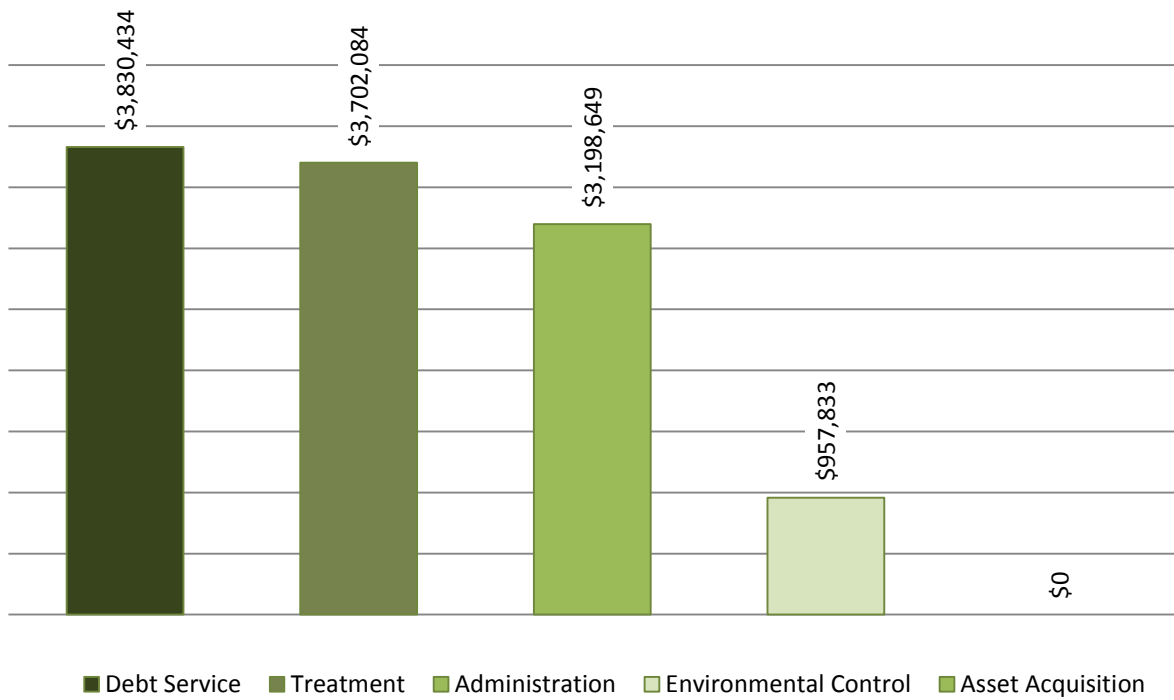

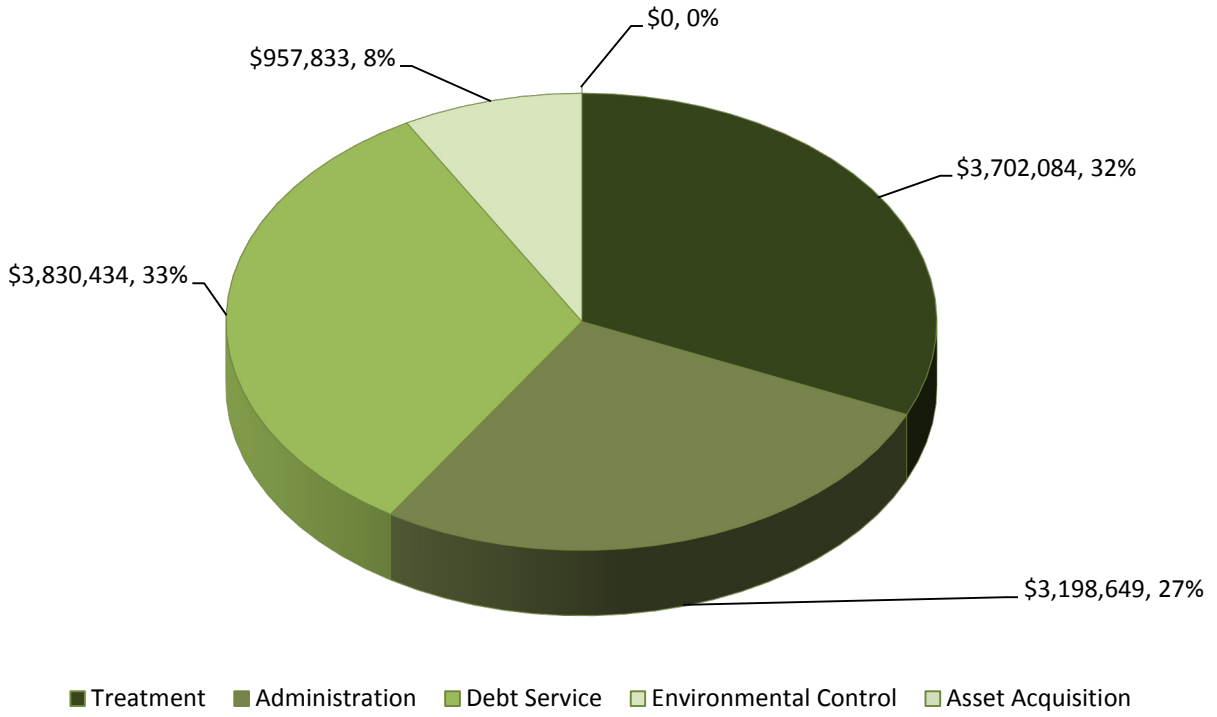

The departmental expenses for each of the enterprise funds are also provided below:

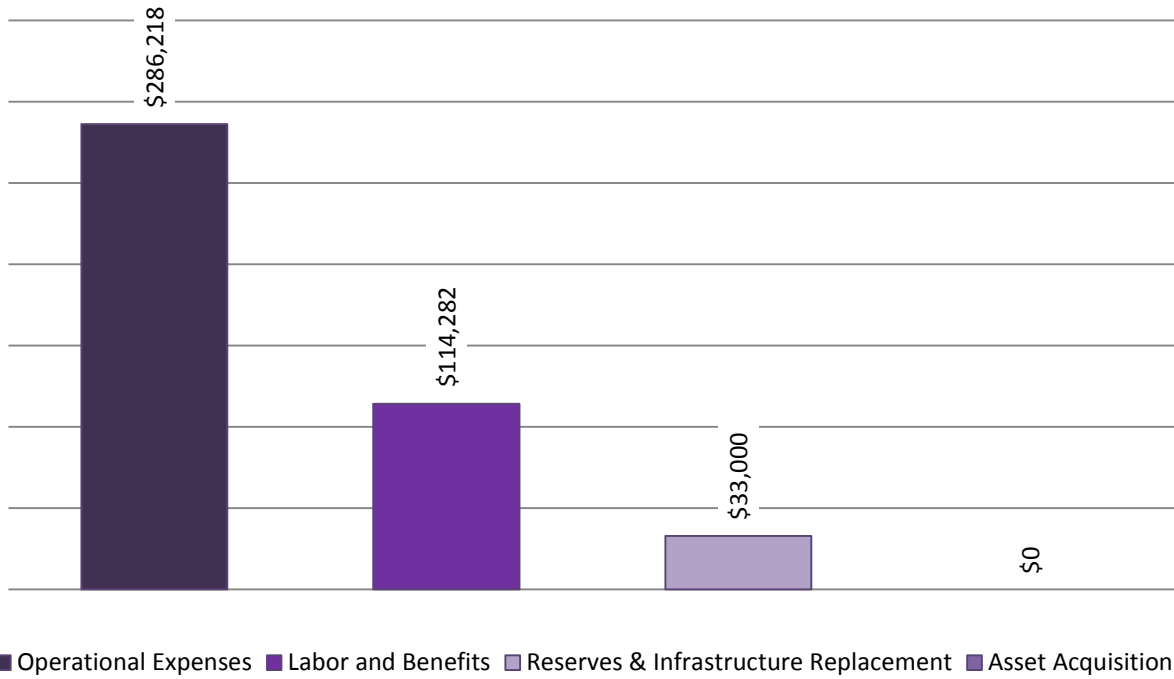

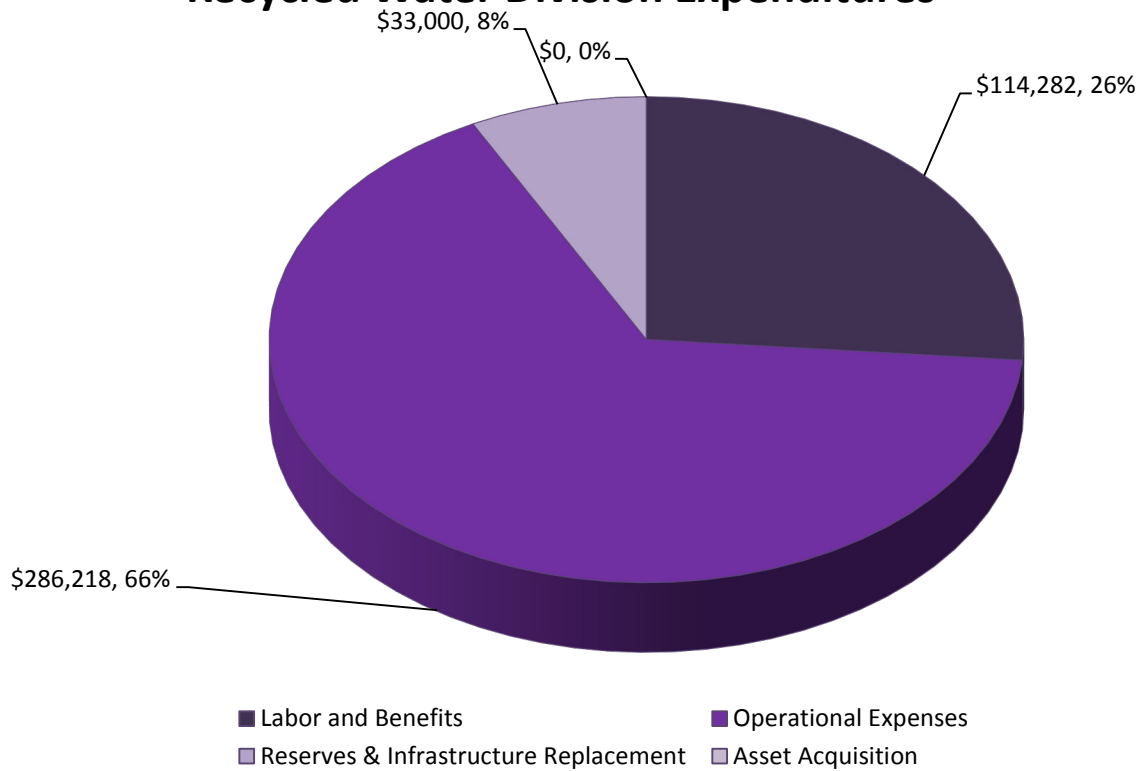

Water Division Expenditures

Sewer Division Expenditures

Chapter Two

Fiscal Year 2015

Water Division
Operating Budget

Water Division Revenue Analysis

Sources of Revenue

The water division receives revenue from a number of different sources with the major sources consisting of the following:

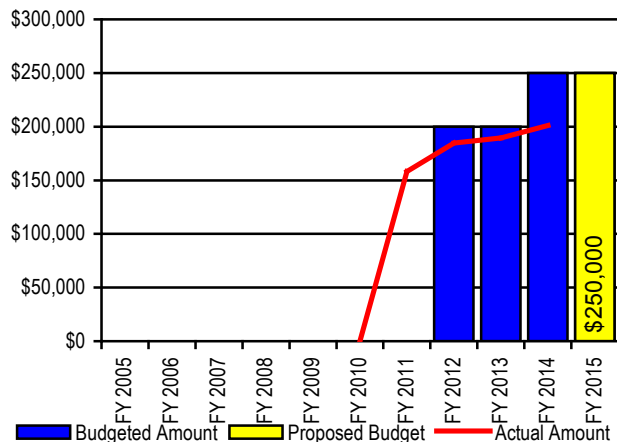

Potable Water - Commodity Charges (02-40010): This revenue source is the variable component of the water sales that is based on the amount of water consumed by our customers. Water sales represent the largest single revenue source in the Water Division. Being a variable cost component of the District's water revenue, this revenue source is by its very nature variable and directly dependent on the amount of water consumed. It is highly subject to seasonal variations and climatic changes.

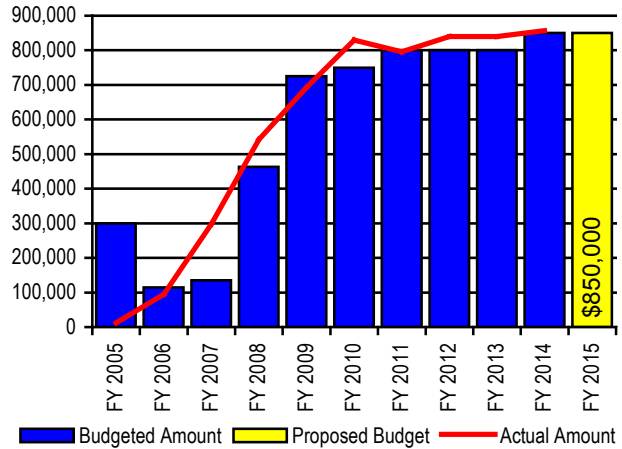

Construction Water - Commodity Charges (02-40011): This highly variable revenue source for potable water consumption is collected from developers and contractors for water used during construction. The amount of water revenue generated from this source is directly dependent on the timing and magnitude of new construction in the Yucaipa Valley. Construction projects utilizing recycled water will be reflected in the recycled water division budget.

Imported Water Sales - San Geronio Pass Water Agency (02-40012): This revenue source is the variable cost associated with the purchase of imported water from the San Geronio Pass Water Agency. The water purchased with these funds is used primarily by the Yucaipa Valley Regional Water Filtration Facility to produce drinking water for the City of Calimesa portion of our service area.

Imported Water - San Bernardino Valley Municipal Water District (02-40013): This revenue source is the variable cost associated with the purchase of imported water from the San Bernardino Valley Municipal Water District. The water purchased with these funds is used primarily by the Yucaipa Valley Regional Water Filtration Facility to produce drinking water for the City of Yucaipa portion of our service area.

Potable Water – Commodity Charge Multi-Unit Discount (02-40014): The latest version of the District’s rate schedule continues to include a discount for the commodity charges for those high density developments with more than 30 dwelling units constructed prior to March 2005. This discount reflects the differential in service requirements for older high density developments.

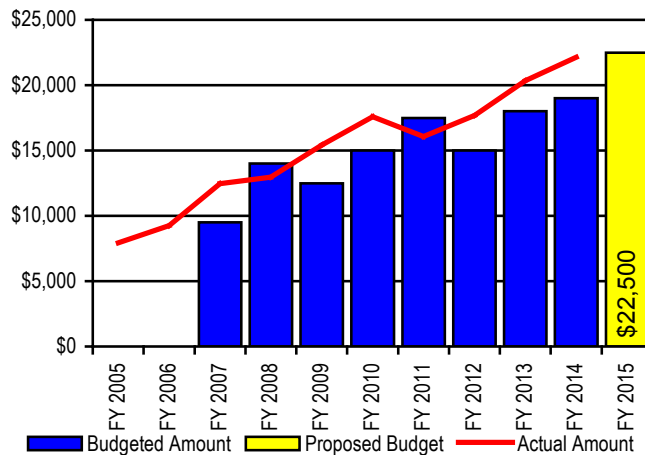

Water Wholesale Revenue (02-40015): This revenue source is generated from the sale of filtered imported water and delivered to one of several existing and proposed water delivery points. The District is only planning on serving Western Heights Mutual Water Company this fiscal year.

Potable Water - Service Demand Charge (02-41000): This revenue source is the fixed rate component charged to all water customers. Since this is a fixed charge, the estimated amount of revenue derived from this source is fairly constant year to year.

Fire Service Standby Fee (02-41001): This revenue source is the fixed rate component charged to all customers that have an independent fire service to protect their property. Since this is a fixed charge, the estimated amount of revenue derived from this source is fairly constant year to year.

Construction Water - Service Charge (02-41003): This revenue source is the fixed rate component charged to all customers using potable water for construction purposes. Like the commodity charge above, since these costs are associated with development, they are also highly variable.

Potable Water – Service Charge Multi-Unit Discount (02-41005): The latest version of the District’s rate schedule continues to include a service charge discount for high density developments of more than 30 dwelling units constructed prior to March 2005. This discount reflects the differential in service requirements for older high density developments.

Unauthorized Use of Water Charge (02-41010): This revenue source is associated with the unauthorized use of water. Generally, the penalty costs associated with the unauthorized use of water has not been a budget item due to the high degree of unpredictability, however, with the historical trend information; this volatile revenue source can be tracked more for historical value than a dependable source of funding.

Water Meter & Lateral Installation Charges (02-41110): This revenue source is associated with the cost for installing a water meter and service lateral for a new customer. The revenue generated from this source is directly dependent on the number of new water meter installations that occur as a result of development.

Fire Flow Measurements and Reports (02-41112): This revenue source is associated with the cost of performing fire flow reports in the field and generating fire flow reports for the fire department, cities and customers. This revenue source is dependent on local economic development and refurbishment activity by homeowners.

Disconnect & Reconnect Charges (02-41113): This revenue source is generated from turning water service off as a result of delinquent payments or closed accounts. This revenue source is generally fairly constant, except for when the costs were adjusted to reflect the true cost of providing this service. This adjustment was expected to reduce the number of disconnect/reconnect services and therefore reduce the revenue generated from this service.

Delinquent Payment Charges (02-41121): This revenue source is generated from late payments of services to the District. The District's late charges are 10% for the first month and 0.5% for any unpaid balance every month thereafter. This late charge is not intended to represent an interest rate or cost of money, but rather a penalty charge for late payment on an account.

Management and Accounting Services (02-42123): This revenue source is a transfer of funds from the wastewater division to the water division to ensure the water and sewer divisions both pay a fair share of expenses related to administration, accounting, and general services.

Interest Earned (02-43010): This revenue source is generated from investment interest earnings. The District's investment policy utilizes U.S. securities as the predominant investment vehicle. Significantly lesser amounts are invested in the Local Agency Investment Fund (LAIF) and money market funds.

Property Tax – Unsecured (02-43110): This revenue source is generated from the unsecured portion of the property tax increment received by the District from properties within the District's service area. Unsecured property taxes are those taxes collected on property that can be relocated and is not real estate. The tax is assessed against such things as business equipment, fixtures, boats and airplanes.

Property Tax – Secured (02-43120):

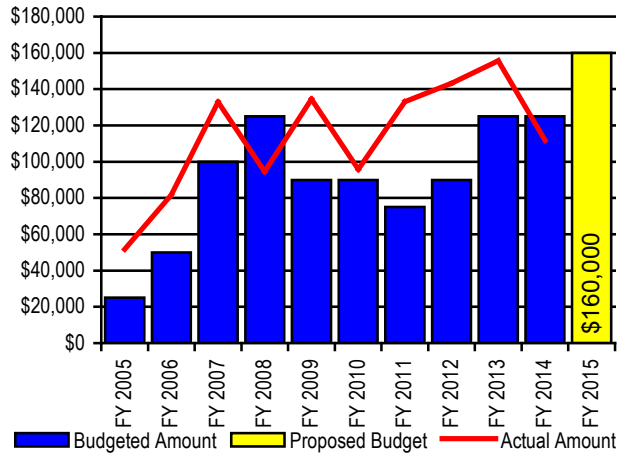

This revenue source is generated from the secured portion of the property tax increment received by the District from properties within the District’s service area. Secured property taxes are those taxes collected on real property such as land and structures.

Tax Collection – Prior (02-43130): This revenue source is generated from the property tax increment collected from prior years.

Other Taxes (02-43140): This revenue account includes other taxes collected and paid to the District.

Miscellaneous Non-Operating Revenue (02-49150): This revenue source is used to track unspecified non-operating revenue that is not directly attributable to the revenue categories previously established in the budget. This account includes recovered expenses associated with property tax collection and reimbursement of state mandated costs in FY 2007.

Other sources of operating revenue for the water division include:

- Service Establishment Fee (02-40016)
- Bad Debt Write-Off & Recovery (02-42124)

Water Resource Department

Department Description – The Water Resource Department is responsible for maintaining the safe and efficient operation of the potable water sources and recycled water distribution system. This involves monitoring and ensuring the production of potable water from the District’s vertical wells and horizontal wells is coordinated with the water processed from the Oak Glen Surface Water Filtration Facility and the Yucaipa Valley Regional Water Filtration Facility. The Water Resource Department also maintains the operation of the recycled water system. The Water Resource Department is responsible for maintaining the vital balance between the seasonal demand for water by our customers and the amount of water produced and pumped to various portions of the water service area.

Departmental Responsibilities – The Water Resource Department is responsible for a total of 32 vertical water production wells, 5 monitoring wells, 6 horizontal water production wells, three separate surface sources, two drinking water filtration facilities, 23 reservoirs, and 10 booster pump stations. Additionally, the Department is responsible for the operation of the recycled water activities of the District.

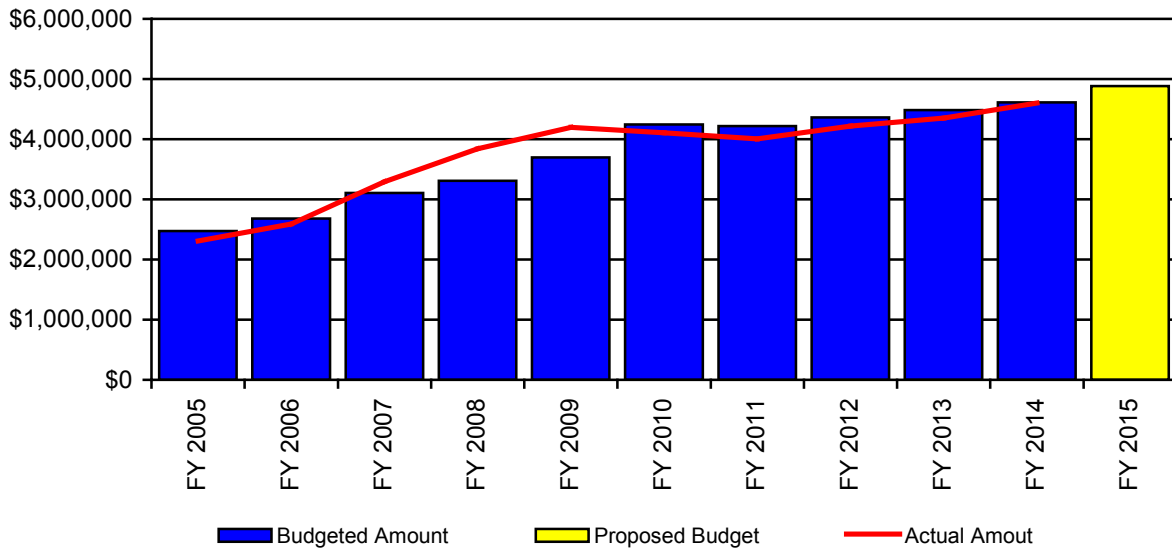

Organizational Structure & Staffing Levels – This year the Water Resources Department has been allocated labor resources of 10.3 Full-Time Equivalent (FTE) employees.

The FTE calculations for this department are as follows:¹

Title	Range	FTE	Expense
Operations Manager	228	0.8	\$ 78,653
Senior Plant Operator	114	2.0	\$ 178,544
Regional Water Quality Supervisor	113	0.3	\$ 29,638
Integrated Operator IV	55	0.5	\$ 41,621
Integrated Operator III	49	2.5	\$ 193,118
Water Operator III	44	1.0	\$ 71,387
Integrated Operator II	42	2.5	\$ 160,661
Water Quality Chemist	40	0.1	\$ 6,385
Water Quality Technician	35	0.1	\$ 5,136
Plant Maintenance Technician I	28	0.5	\$ 24,102
	Total	10.3	\$ 789,245

¹ The positions that are assigned a FTE value of less than 1.0 are involved in the integrated operator program and are cross-trained with the Sewer Division, Treatment Department.

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses over the past several years.

This year, the Water Resource Department will be allocated \$4,883,119 (not including asset acquisitions & capital improvements), which represents an increase of \$269,369 as compared to the previous year, or a 5.84% increase.

This budget is based largely on the previous year’s water demands and energy costs.

Anticipated Issues for this Fiscal Year – The following issues need to be closely monitored during future periods to minimize unexpected financial commitments of District funds. The specific resolution to the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

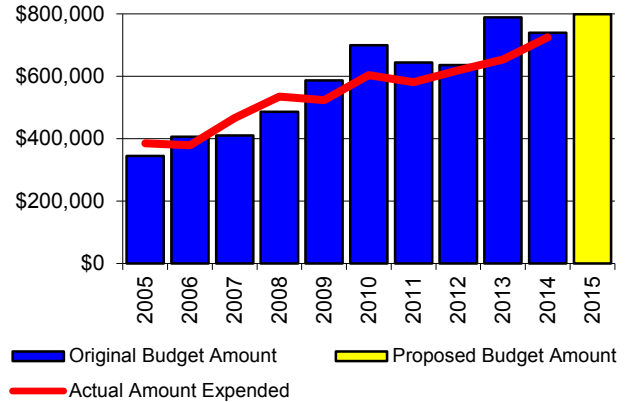

- The District currently needs to review the funding levels for the replacement of water related infrastructure including: wells, reservoirs, pipelines and booster stations. A category of funding has been developed to start the process of project funding. Further evaluation by District staff is necessary to adequately fund the infrastructure replacement needs of the District.

Water Division – Water Resource Department

Total	<u>\$ 600,000</u>

Public Works Department

Department Description – The Public Works Department provides the routine and emergency maintenance and repair of District water, sewer and recycled water facilities.

Departmental Responsibilities – The Public Works Department is responsible for ensuring that the water, sewer and recycled water service to our customers is always provided in a safe, reliable and cost effective manner. In order to accomplish this goal, the Department is responsible for coordinating routine inspection and maintenance of District facilities. This includes:

- Routine and emergency inspections, operation and maintenance of all water related facilities (valves, fire hydrants, blow-offs, pressure reducing valves, pressure sustaining valves, wells, reservoirs, and booster stations);
- Routine and emergency maintenance of all sewer collection facilities (including manholes, lift stations, sewer mainlines, trench subsidence, sewer laterals, and ancillary facilities at the sewer treatment plant);
- Routine and emergency operation, inspection and maintenance of recycled water facilities (including pipelines, service lines, and meters); and
- Routine maintenance at the Yucaipa Valley Regional Water Filtration Facility and the Wochholz Regional Water Recycling Facility.

Some of the responsibilities provided above will receive additional labor resources from staff members in other departments.

Organizational Structure & Staffing Levels – This year the Public Works Department has been allocated labor resources of 14.9 Full-Time Equivalent (FTE) employees.

The FTE calculation details for this department are as follows:

Title	Range	FTE	Expense
Public Works Manager	234	0.9	\$ 94,338
Public Works Supervisors	113	4.0	\$351,541
Purchasing Agent	42	1.0	\$ 72,326
Utility Service Worker IV	44	0.9	\$ 57,567
Utility Service Worker III	40	1.8	\$107,272
Utility Service Worker II	36	2.7	\$147,289
Utility Service Worker I	32	3.6	\$179,431
Total		14.9	\$433,9921,009,764

The employees of this department generally create two to four crews depending on the tasks to be completed.

This staffing level is critical in order to complete the necessary inspection and maintenance of facilities, as well as maintain an emergency response team available twenty-four (24) hours per day, seven (7) days a week.

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses for the past several years.

This year, the Public Works Department will be allocated \$2,347,764 (not including asset acquisitions & capital improvements), which represents an increase of \$76,514 as compared to the previous year, or a 3.37% increase.

Anticipated Issues for This Fiscal Year – The following issues have been identified for the next fiscal year. The specific resolution to the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

- ❖ The Public Works Department serves a vital role of conducting regular routine inspections, repairs, construction, and non-warranty maintenance work at all District facilities. Based on the results of the inspections, the members of this department generate work orders to ensure that the facilities are properly maintained. Individuals within this department will augment the staff members from other departments on an as needed basis.
- ❖ The following programs¹ will be maintained by the Utility Service Department:
 - Yucaipa Valley Regional Water Filtration Facility – The non-warranty maintenance duties at this facility are performed by individuals in this department. Warranty repairs will be performed by the Water Resource Department. Complex maintenance activities will be contracted to specialty firms under the direction of the Water Resource Department.
 - Wochholz Regional Water Recycling Facility – The non-warranty maintenance duties at this facility are performed by individuals in this department and the Environmental Control Department. Warranty repairs will be performed by the Sewer Treatment Department. Complex maintenance activities will be contracted to specialty firms under the direction of the Sewer Treatment Department.

¹ The large number of the programs listed is mandated by local, State or Federal authorities. All of the programs represent a proactive approach by the District to minimize emergency repairs by maintaining the investment in assets owned by the District.

- Valve Maintenance Program – Valve maintenance will be a high priority for this department. The District has approximately 3,000 valves that need to be inspected and exercised every three years. This maintenance function may require repairs and/or replacement of the valve operation equipment.
- Fire Hydrant Maintenance Program – Fire hydrant inspections, fire flow tests and pressure readings from the District's fire hydrants will also be a high priority. The fire hydrant maintenance program will be designed throughout the year to inspect all fire hydrants and convey operational data to the Engineering Department for analysis and record keeping. The District has approximately 1,050 fire hydrants.
- Sewer Trench Subsidence Repair – Sewer collection system subsidence repair will need to continue this year. The repairs to the trenches will be the responsibility of the Utility Services Department. The department will work together with local paving contractors to facilitate the repair of District sewer collection system trenches.
- Emergency Water Mainline & Service Repairs – The department staff are the first line responders to emergency water repairs. These individuals generally respond to about 140 water leaks per year.
- Air Release Valve Repair/Replacement Program – The District has several air release valves in the water and sewer system. The operation of these valves is critical to the safe and efficient operation of the District. The department staff members will inspect the existing air release valves and determine if repairs or replacement is necessary.
- Well & Reservoir Site Maintenance – The department will perform the routine maintenance and upkeep of the District's well and reservoir sites. This will include the routine weed abatement, painting, fence repair, structure repair, etc.
- Service Line Replacement Program – This program involves the replacement of approximately 125 water service lines per year.
- Underground Service Alert Program – The USA program involves the marking and identification of water and sewer infrastructure.
- Flushing Program – The flushing program is another important program performed by this department. The flushing program involves the sequential flushing of approximately 300 fire hydrants to make sure the water delivered to our customers is always fresh and clean.
- Installation of Sewer Lateral Cut-Off Walls – This department will be involved in the installation of approximately 100 cut-off walls during the year. The installation of cut-off walls has appeared to reduce the severity of sewer mainline trench subsidences over the past few years. The installation of cut-off walls is now required of all new developments.
- Manhole Repair Program – The environmental control department continues to perform routine inspection of the District's manholes. All repair work is currently being directed to the utility service department. This Department can expect to receive at least 12 repair requests per month.

Administrative Service Department

Department Description – The administrative service department consists of four sub-departments: management; accounting; customer service; and engineering. These sub-departments provide administrative services to the three District enterprises: water, sewer, and recycled water.

Departmental Responsibilities – The administrative service department is responsible for ensuring the following:

- Management: The individuals in Management are responsible for managing the operational and planning functions of the District. This includes risk management, fund investment, board member information, policy management, human resources, and public relations.
- Accounting: The individuals in Accounting are responsible for all accounting functions which range from tracking District assets to maintaining accounts payable, accounts receivable, and payroll. Accounting is also responsible for maintaining fund balances, tracking of development impact fees, and maintaining the current budget.
- Customer Service: The individuals in Customer Service are responsible for all general customer related activities such as maintaining the customer service database, processing of utility billing, receiving all fees/charges, maintaining service records for the Department of Health Services.
- Engineering: The individuals in Engineering are responsible for all engineering related functions including: water and sewer modeling; GIS studies and applications; consultant and contractor oversight; development of design and construction standards; plan check and inspection services; and performing other related engineering studies and services.

Organizational Structure & Staffing Levels – This year the Administration Department has been allocated labor resources of 8.5 Full-Time Equivalent (FTE) employees.

The FTE calculation details for this department are as follows:

Title	Range	FTE	Expense
General Manager	--	0.45	\$ 77,512
Assistant General Manager	245	0.45	\$ 54,805
Controller	240	0.5	\$ 56,550
Water Resource Manager	232	0.6	\$ 65,038
Engineering Manager	230	0.5	\$ 50,910
Administrative Supervisor	112	0.5	\$ 44,905
Management Analyst	106	0.5	\$ 35,190
Engineering Technician IV	45	0.5	\$ 42,890
Engineering Technician II	37	0.5	\$ 31,954
Administrative Clerk IV	35	1.5	\$ 91,762
Engineering Technician I	33	0.5	\$ 29,042
Utility Service Worker I	32	1.5	\$ 83,338
Administrative Clerk III	31	0.5	\$ 23,771
Total		8.50	\$687,667,667

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses over the past several years.

This year, the Water Administrative Services Department will be allocated \$2,910,442 (not including asset acquisitions & capital improvements), which represents an increase of \$33,242 as compared to the previous year, or a 1.16% increase.

Anticipated Issues for This Fiscal Year – The following issues have been identified for this fiscal year. The specific resolution to the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

- The District continues to underfund our actual depreciation expenses. This issue is most readily apparent in the annual financial audit which shows the following funded and unfunded depreciation expense.

In order to adequately fund the repair and replacement of District facilities, additional funding is necessary.

Description:

Prudent financial planning and fiscal responsibility includes anticipating and preparing for future funding requirements as well as unforeseen and unexpected emergencies, disasters, and other events. The District has established this annual reserve for its long-term organizational and operational stability and to enable the District to minimize significant rate fluctuations due to unforeseen and expected cash flow requirements during the year. This reserve fund is to ensure that the district accumulates, manages, maintains, and uses certain financial resources only for specific purposes.

At the conclusion of this fiscal year, these funds will be strictly designated to fund water division depreciation reserves.

Water Division Debt Service

Department Description – The Water Debt Service expenditures are associated with the 2004A bond issuance.

Background of Debt Issuance – The Yucaipa Valley Water District Financing Corporation was established on May, 24, 2004 as a nonprofit public benefit corporation organized for the sole purpose of acquiring, constructing, rehabilitating, financing and refinancing of, or providing for the sale or leasing of, facilities, land and equipment for the use, benefit and enjoyment of the public served by public agencies in the State of California and any other purpose incidental thereto. In June 2004, the Yucaipa Valley Water District Financing Corporation issued \$45,730,000 in revenue bonds for the construction of water related facilities related to the Yucaipa Valley Regional Water Filtration Facility.

The following schedule provides the principal and interest payments through the full term of the financing.

The bond payments shown above are just a portion of the bond term. The full term of the bonds extends until 2035.

Asset Acquisition – Water Division

BUDGETARY DESCRIPTION – The Asset Allocation portion of the operating budget is used for the purchase of specific fixed assets which are generally greater than \$5,000.¹ This portion of the budget will be used by the accounting department to appropriately categorize and track the purchase of fixed assets.

PROCUREMENT METHODOLOGY – The following schematic diagram illustrates the methodology used by the District staff to secure the purchase of the fixed assets.

General Procedure for Asset Evaluation & Procurement

¹ Items purchased during the fiscal year that is \$5,000 or less will be expensed at the time of purchase instead of carried as a District asset.

At a minimum, the District staff will present all purchases to a committee of the Board prior to presenting the purchase of an asset to the Board of Directors for consideration. In the case of a planned asset purchase, the entire Board will be able to review the conceptual purchase of an asset at a budget workshop prior to having the item presented to a committee. It is important to recognize that all budget workshops, committee meetings, and board meetings are open to the public.

As a general rule of thumb, asset acquisition will be funded by existing reserve funds. Therefore, the budget will have an offsetting amount of reserve funds added to the revenue portion of the budget for each asset identified below.

BUDGET OVERVIEW – The following summary represents the total acquisition allocation by department for the water division.

Water Division Department Requesting Asset Acquisition	Estimated Cost Associated with the Proposed Asset Acquisitions	Amount of Offsetting Reserve Funds Added to Operating Revenue
Water Resources Department	\$ 0	--

Chapter Three

Fiscal Year 2015

**Sewer Division
Operating Budget**

Sewer Division Revenue Analysis

Sources of Operating Revenue

The sewer division receives operating revenue from a number of different sources with the major sources consisting of the following:

Sewer Service Demand Charge (03-41000): This revenue source is the fixed rate component charged to all sewer customers. Since this is a daily fixed charge, the estimated amount of revenue derived from this source is fairly constant year to year. This is the single largest revenue source for the sewer division.

Sewer Service Demand Charge Multi-Unit Discount (03-41005): The latest version of the District's rate schedule continues to include a discount for the sewer service demand charges for those high density developments with more than 30 dwelling units constructed prior to March 2005. This discount reflects the differential in service requirements for older high density developments.

Septage Pumping (03-41116): This revenue source represents the funds received by the District for disposing of septic generated wastes. This revenue source is due primarily to one vender and is highly variable.

Penalty Late Charges (03-41121): This revenue source is generated from late payments of sewer services. The District's late charges are 10% for the first month and 0.5% for any unpaid balance every month thereafter. This late charge is not intended to represent an interest rate or cost of money, but rather a penalty charge for late payment on an account.

Other Operating Revenue (03-42122): This revenue source is generated from miscellaneous operating revenue sources. This category generally includes inspection and permit fees on existing laterals and other miscellaneous sources of revenue.

Rate Stabilization Transfer In (03-41125): This revenue source is used to reduce the impact of expenditures triggered by environmental and regulatory compliance within the sewer division. Rate stabilization funds will be held in a restricted reserve fund to be used when unexpected or costly events occur.

Interest Earnings (03-43010): This revenue source is generated from investment interest earnings. The District's investment policy utilizes U.S. securities as the predominant investment vehicle. Significantly lesser amounts are invested in the Local Agency Investment Fund (LAIF) and money market funds.

Property Tax – Unsecured (03-43110): This revenue source is generated from the unsecured portion of the property tax increment received by the District from properties within the District's service area. Unsecured property taxes are those taxes collected on property that can be relocated and is not real estate. The tax is assessed against such things as business equipment, fixtures, boats and airplanes.

Property Tax – Secured (03-43120): This revenue source is generated from the secured portion of the property tax increment received by the District from properties within the District's service area. Secured property taxes are those taxes collected on real property such as land and structures.

Tax Collection – Prior (03-43130): This revenue source is generated from the property tax increment collected from prior years.

Other sources of operating revenue for the sewer division include:

- Service Establishment Fee (03-40016)
- Sewer Lateral Installation (03-41110)
- Bad Debt Write-Off & Recovery (03-41124)
- Other Taxes (03-43140)
- Misc. Non-Operating Revenue (03-49150)

Sewer Treatment Department

Department Description – The Sewer Treatment Department is responsible for maintaining the safe and efficient operation of the sewer treatment facility. This involves operating the sewer treatment plant in compliance with all federal, state and local regulations and optimizing the sewer treatment process to maximize the effectiveness of the District's resources.

Departmental Responsibilities – The Sewer Treatment Department is responsible for compliance with the conditions of the Clean Water Act, the District's Waste Discharge permit, and with Regional Water Quality Control Board requirements. Responsibilities for this department also include maintaining an on-site laboratory, monitoring the operation of the treatment facility 24 hours a day, and conducting routine maintenance on equipment and at each process necessary to meet the required permits/regulations.

Organizational Structure & Staffing Levels – This year the District has assigned labor resources of 12.3 Full-Time Equivalent (FTE) employees to the Sewer Treatment Department. The FTE calculations for this department are as follows:¹

Title	Range	FTE	Expense
Operations Manager	228	0.8	\$ 77,616
Senior Plant Operator	114	2.0	\$ 209,512
Regional Water Quality Supervisor	113	0.7	\$ 69,156
Integrated Operator IV	55	0.5	\$ 41,621
Integrated Operator III	49	2.5	\$ 193,118
Wastewater Operator III	44	1.0	\$ 83,945
Integrated Operator II	42	2.5	\$ 160,660
Water Quality Chemist	40	0.9	\$ 57,467
Water Quality Technician	35	0.9	\$ 46,227
Plant Maintenance Technician I	33	0.5	\$ 24,102
Integrated Operator In Training	32	--	\$ 0
Total		12.33	\$963,424 963,424

¹ The positions that are assigned a FTE value of less than 1.0 are involved in the integrated operator program and are cross-trained with the Water Division, Water Resource Department.

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses over the past several years.

This year, the Sewer Treatment Department will be allocated \$3,702,084 (not including asset acquisitions), which represents an increase of \$157,785 or a 4.45% increase.

Anticipated Issues for This Fiscal Year – The following issues have been identified as important issues for the near future. The specific resolution to some of the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

- With the completion of the new biological processes, tertiary membranes, and ultraviolet disinfection process, the District will be able to produce a pristine recycled water supply. The staff members of the Treatment Department are continuing to operate the facilities in conjunction with the newly completed salinity control facilities and associated brineline.

Sewer Administrative Services Department

Department Description – The Sewer Administrative Services Department is accountable for the overall safe, efficient and reliable operation of the sewer division which includes sewer treatment department and the laboratory. While the expenses related to the environmental control department are contained within the sewer division, the organizational structure is more conducive to have the Environmental Control personnel report to the Public Works Manager.

Departmental Responsibilities – The Sewer Administrative Services Department is responsible for ensuring the following:

- Management: The individuals in Management are responsible for managing the operational and planning functions of the District. This includes risk management, fund investment, Director information, policy management, human resources, and public relations.
- Accounting: The individuals in Accounting are responsible for all accounting functions which range from tracking District assets to maintaining accounts payable, accounts receivable, and payroll. Accounting is also responsible for maintaining fund balances, tracking of development impact fees, and maintaining the current budget.
- Customer Service: The individuals in Customer Service are responsible for all general customer related activities such as maintaining the customer service database, processing of utility billing, receiving all fees/charges, maintaining service records for the Department of Health Services.
- Engineering: The individuals in Engineering are responsible for all engineering related functions including: water and sewer modeling; GIS studies and applications; consultant and contractor oversight; development of design and construction standards; plan check and inspection services; and performing other related engineering studies and services.

Organizational Structure & Staffing Levels – This year the District has assigned labor resources of 8.1 Full-Time Equivalent (FTE) employees to the Administrative Department of the Sewer Division. The FTE calculation details for this department are as follows:

Title	Range	FTE	Expense
General Manager	--	0.45	\$ 77,512
Assistant General Manager	245	0.45	\$ 54,805
Controller	240	0.5	\$ 56,550
Water Resource Manager	232	0.2	\$ 21,679
Engineering Manager	230	0.5	\$ 50,910
Administrative Supervisor	112	0.5	\$ 44,905
Management Analyst	106	0.5	\$ 35,190
Engineering Technician IV	45	0.5	\$ 42,890
Engineering Technician II	37	0.5	\$ 31,954
Administrative Clerk IV	35	1.5	\$ 91,763
Engineering Technician I	33	0.5	\$ 29,042
Utility Service Worker I	32	1.5	\$ 83,338
Administrative Clerk III	31	0.5	\$ 23,771
Total		8.1	\$ 644,309

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses over the past several years.

This year, the Sewer Administrative Services Department will be allocated \$3,198,649 (not including asset acquisitions & capital improvements), which represents a decrease of \$164,691 or a -4.90% decrease.

Anticipated Issues for This Fiscal Year – The following issues have been identified for the next fiscal year. The specific resolution to the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

- The District continues to underfund our actual depreciation expenses. This issue is most readily apparent in the annual financial audit which shows the following funded and unfunded depreciation expense.

In order to adequately fund the repair and replacement of District facilities, additional funding is necessary.

-------------	------------------

Description:

Prudent financial planning and fiscal responsibility includes anticipating and preparing for future funding requirements as well as unforeseen and unexpected emergencies, disasters, and other events. The District has established this annual reserve for its long-term organizational and operational stability and to enable the District to minimize significant rate fluctuations due to unforeseen and expected cash flow requirements during the year. This reserve fund is to ensure that the District accumulates, manages, maintains, and uses certain financial resources only for specific purposes.

At the conclusion of this fiscal year, these funds will be strictly designated to fund the replacement of sewer related infrastructure (depreciation reserves).

Environmental Control Department

Department Description – The Environmental Control Department maintains and inspects the facilities related to the sewer collection system. This involves the routine maintenance and inspection associated with lift stations, sewer mainlines, force mainlines, and manholes, as well as pretreatment activities.

Departmental Responsibilities – The Environmental Control Department is responsible for maintaining the sewer collection system. This includes inspecting each of the District's manholes on a regular basis, preparing the collection system for wet weather conditions, conducting routine cleaning of the collection system, complying with all confined space regulations, and video inspecting sewer mainlines. The Environmental Control Department is also responsible for conducting industrial pretreatment inspections and brine line related activities.

Organizational Structure & Staffing Levels – This year the District has assigned labor resources of 4.0 Full-Time Equivalent (FTE) employees to the Environmental Control Department. The FTE calculations for this department are as follows:

Title	Range	FTE	Expense
Regulatory & Environmental Control Mgr	228	1.0	\$ 93,900
Utility Service Worker IV	44	1.1	\$ 71,284
Utility Service Worker III	40	0.2	\$ 11,919
Utility Service Worker II	36	1.3	\$ 71,013
Utility Service Worker I	32	0.4	\$ 19,937
	Total	4.00	\$ 268,053

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses over the past several years.

This year, the Environmental Control Department will be allocated \$957,833 (not including asset acquisitions & capital improvements), which represents an increase of \$26,053 as compared to the previous year, or a 2.80% increase.

Anticipated Issues for This Fiscal Year – The following issues have been identified as important issues for the near future. The specific resolution to some of the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

- ❖ The District staff continues to improve our ability to respond to various line maintenance situations. The heavy-duty sewer mainline cleaning vehicles allocated to this department significantly improve the maintenance activities throughout the collection system.
- ❖ The District staff continues to utilize video equipment to conduct routine inspections of the sewer collection system. The Environmental Control staff will be analyzing the costs and benefits of purchasing a video vehicle to be better prepared to inspect the sewer collection system.

Sewer Division Debt Service

Department Description – The Sewer Debt Service expenditures are associated with the State Revolving Fund (SRF) loan for the expansion and upgrade of the Wochholz Regional Water Recycling Facility and various recycled water facilities.

Background of Debt Issuance

Wochholz Regional Water Recycling Facility Expansion - The Yucaipa Valley Water District has secured a \$44,748,356 low interest loan (2.4% interest rate) for the expansion and upgrade of the Wochholz Regional Water Recycling Facility. The District received full disbursement of the loan fund in FY 2009 and annual repayment of \$2,923,669 started in FY 2010 based on the following schedule:

The annual loan payments are due on September 10th. The loan extends until September 10, 2028.

Yucaipa Valley Regional Brineline - The Yucaipa Valley Water District has secured a \$9,752,100 low interest loan (2.7% interest rate) for the construction of the Yucaipa Valley Regional Brineline. The construction cost for this facility was \$19,706,156 which was also funded by several grants and cash. The District received full disbursement of the loan fund in FY 2013 and annual repayment of \$649,274 started in FY 2014 based on the following schedule:

The annual loan payments are due on December 31st. The loan extends until December 31, 2032.

Wochholz Improved Salinity Effluent Project (W.I.S.E.) - The Yucaipa Valley Water District has secured a \$2,988,364 low interest loan (2.2% interest rate) for the construction of the reverse osmosis equipment at the Wochholz Regional Water Recycling Facility to achieve compliance with the Regional Water Quality Control Board Basin Plan objectives. The construction cost for this facility was \$5,003,170 which was also funded by grants and cash. The District received full disbursement of the loan fund in FY 2014 and annual repayment of \$184,925 started in FY 2014 based on the following schedule:

The annual loan payments are due on March 31st. The loan extends until March 31, 2033.

Recycled Water Reservoir R-10.3 - The Yucaipa Valley Water District has secured a \$871,570 low interest loan (2.2% interest rate) for the construction of the Recycled Water Reservoir Complex R-10.3. The construction cost for this facility was \$4,177,087 which was also funded by grants and cash. The District received full disbursement of the loan fund in FY 2014 and annual repayment of \$51,531 started in FY 2014 based on the following schedule:

The annual loan payments are due on March 31st. The loan extends until March 31, 2033.

Crow Street Recycled Water Pipeline and Booster B-12.1 - The Yucaipa Valley Water District has secured a \$342,124 low interest loan (2.2% interest rate) for the construction of the Crow Street Recycled Water Pipeline and Recycled Water Booster Station B-12.1. The construction cost for this facility was \$2,972,167 which was also funded by grants and cash. The District anticipates receiving the loan disbursements for the project in FY 2015 and annual loan repayment of approximately \$21,000 will begin in FY 2015 based on the following schedule:

The SRF loan payments shown above are just a portion of the total loan term. The full term of the loan extends until 2034.

Asset Acquisition – Sewer Division

Budgetary Description – The Asset Allocation portion of the operating budget is used for the purchase of specific fixed assets which are generally greater than \$5,000. This portion of the budget will be used by the accounting department to appropriately categorize and track the purchase of fixed assets.

Procurement Methodology – The following schematic diagram illustrates the methodology used by the District staff to secure the purchase of the fixed assets.

General Procedure for Asset Evaluation & Procurement

At a minimum, the District staff will present all purchases to a committee of the Board prior to presenting the potential purchase to the Board of Directors for action. In the case of a planned purchase, the entire Board will be able to review the purchase of an asset at a budget workshop prior to being presented to a committee. It is important to recognize that all budget workshops, committee meetings, and board meetings are open to the public.

As a general rule of thumb, asset acquisition will be funded by existing reserve funds. Therefore, the budget will have an offsetting amount of reserve funds added to the revenue portion of the budget for each asset identified below.

Budget Overview – The following summary represents the total acquisition allocation by department for the sewer division.

Sewer Division Department Requesting Asset Acquisition	Estimated Cost Associated with the Proposed Asset Acquisitions
Sewer Treatment Department	\$ 0
Sewer Administrative Services Department	\$ 0
Environmental Control Department	\$ 0

Chapter Four

Fiscal Year 2015

**Recycled Water Division
Operating Budget**

Recycled Water Division Revenue Analysis

Sources of Revenue

The recycled water division receives revenue from a number of different sources with the major sources consisting of the following:

Recycled Water - Commodity Charges (04-40010): This revenue source is the variable component of the recycled water sales that is based on the amount of recycled water consumed by our customers. Recycled water sales represent the largest single revenue source in the Recycled Water Division. However, as a variable revenue component, this revenue source is directly dependent on the amount of water consumed. It is highly subject to seasonal variations and climatic changes.

Construction Water – Commodity Charges (04-40011): This revenue source is highly variable recycled water consumption revenue collected from developers and contractors for construction purposes. The amount of revenue generated from this source is directly dependent on the timing and magnitude of new construction in our service area. A similar revenue category exists for in the water division for potable water used for construction purposes.

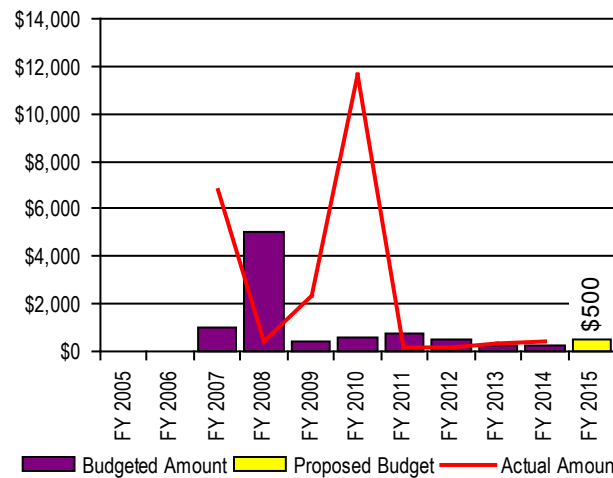

Recycled Water - Service Demand Charge (04-41000): This revenue source is the fixed rate component charged to all recycled water customers. Since this is a fixed charge, the estimated amount of revenue derived from this source is fairly constant year to year.

Construction Water – Minimum Charge (02-41003): This revenue source is the fixed rate component charged to all customers using recycled water for construction purposes. Like the commodity charge above, since these costs are associated with development, they are also highly variable.

Penalty Late Charges (04-41121): This revenue source is generated from late payments of sewer services. The District's late charges are 10% for the first month and 0.5% for any unpaid balance every month thereafter. This late charge is not intended to represent an interest rate or cost of money, but rather a penalty charge for late payment on an account.

Interest Earnings (04-43010): This revenue source is generated from investment interest earnings. The District's investment policy utilizes U.S. securities as the predominant investment vehicle. Significantly lesser amounts are invested in the Local Agency Investment Fund (LAIF) and money market funds.

Property Tax – Unsecured (04-43110):

This revenue source is generated from the unsecured portion of the property tax increment received by the District from properties within the District’s service area. Unsecured property taxes are those taxes collected on property that can be relocated and is not real estate. The tax is assessed against such things as business equipment, fixtures, boats and airplanes.

Property Tax – Secured (04-43120):

This revenue source is generated from the secured portion of the property tax increment received by the District from properties within the District’s service area. Secured property taxes are those taxes collected on real property such as land and structures.

Tax Collection – Prior (04-43130): This revenue source is generated from the property tax increment collected from prior years.

Other sources of operating revenue for the recycled division include:

- Meter/Lateral Installation (04-41110)
- Revenue-Other, Operating (04-41122)
- Other Taxes (04-43140)
- Misc. Non-Operating Revenue (04-49150)

Recycled Water Administrative Services Department

Department Description – The Recycled Water Division consists of individual assigned to other duties that work together the implement, monitor, inspect, operate and perform the required duties of the recycled water enterprise.

Departmental Responsibilities – The Recycled Water Department is responsible for developing the District’s activities related to recycled water service in the community.

Organizational Structure & Staffing Levels – This year the District has assigned labor resources of 0.9 Full-Time Equivalent (FTE) employees for the Recycled Water Division. The FTE calculation details for this department are as follows:

Title	Range	FTE	Expense
General Manager	--	0.1	\$ 17,225
Assistant Manager	245	0.1	\$ 12,179
Public Works Manager	234	0.1	\$ 10,482
Water Resource Manager	232	0.2	\$ 21,679
Operations Manager	228	0.4	\$ 39,067
	Total	0.9	\$100,632

Budget Overview – The following illustration shows the amount of funds budgeted and the actual expenses over the past several years.

This year, the administrative service department will be allocated \$433,500, which represents an increase of \$56,885 as compared to the previous year, or a 15.10% increase.

Anticipated Issues for This Fiscal Year – The following issues have been identified for this fiscal year. The specific resolution to the issues presented below may need to be further analyzed by District staff and presented to the Board of Directors for the adoption of a specific policy, procurement or other action as deemed necessary.

- The District continues to underfund our actual depreciation expenses. This issue is most readily apparent in the annual financial audit which shows the following portion of funded depreciation expense.

In order to adequately fund the repair and replacement of District facilities, additional funding is necessary in this line item.

2015	\$8,000
-------------	----------------

Description:

Prudent financial planning and fiscal responsibility includes anticipating and preparing for future funding requirements as well as unforeseen and unexpected emergencies, disasters, and other events. The District has established this annual reserve for its long-term organizational and operational stability and to enable the District to minimize significant rate fluctuations due to unforeseen and expected cash flow requirements during the year. This reserve fund is to ensure that the District accumulates, manages, maintains, and uses certain financial resources only for specific purposes.

At the conclusion of this fiscal year, these funds will be strictly designated to fund the replacement of recycled water related infrastructure (depreciation reserves).

Chapter Five

Fiscal Year 2015

Capital Improvement Budget

Capital Improvement Program

A systematic, organized approach to planning capital facilities provides a number of benefits:

Using taxpayers' dollars wisely. Advance planning and scheduling of infrastructure may avoid costly mistakes. The effort put into deliberate assessment of the need for repair, replacement or expansion of existing infrastructure, as well as careful evaluation of the need and timing of new facilities can provide savings. Project timing may be improved to better use available personnel, expensive equipment and construction labor by scheduling related major activities over a longer period. Coordination of construction of several projects may affect savings in construction costs (a newly paved street may not have to be torn up to replace utility lines). Overbuilding or underbuilding usually can be avoided. Needed land can be purchased at lower cost well in advance of construction.

Focusing on community needs and capabilities. District projects should reflect the community's needs, objectives, expected growth and financial capability. With limitations for funding capital facilities, planning ahead will help assure that high priority projects will be built first.

Obtaining community support. Citizens tend to be more receptive toward projects which are part of a community-wide analysis. A high priority project which is part of an overall plan is less suspect as being someone's "pet project". Where the public participates in the planning of community facilities the citizens are better informed about the community needs and the priorities. A capital improvement program reduces the pressure on elected officials to fund projects which may be of low priority.

Encouraging economic development. Typically, a firm considering expansion or relocation is attracted to a community which has well planned and well managed facilities in place. Also, a capital improvement program allows private investors to understand a community's tax loads and service costs, and reflects the fact that the community has completed advance planning to minimize the costs of capital facilities.

More efficient administration. Coordination of capital improvements construction among city, county and special districts can reduce scheduling problems, conflicts and overlapping of projects. Also, work can be scheduled more effectively when it is known in advance what, where and when projects are to be undertaken. A capital improvements program allows a community to anticipate lead times necessary to conduct bond elections and bond sales, prepare design work and let contract bids.

Maintaining a stable financial program. Abrupt changes in the tax structure and bonded indebtedness may be avoided when construction projects are spaced over a number of years. Major expenditures can be anticipated, resulting in the maintenance of a sound financial standing through a more balance program of bonded indebtedness. Where there is ample time for planning, the most economical methods of financing each project can be selected in advance. Keeping planned projects within the financial capacity of the community helps to preserve its credit and bond rating and makes the area more attractive to business and industry.

Federal and state grant and loan programs. A capital improvements program places the community in a better position to take advantage of federal and state grant programs, because plans can be made far enough in advance to utilize matching funds, both anticipated and

unanticipated. Most federal and state grant/loan programs either require prior facilities planning, or favor, in ranking applications, applicants which have conducted such planning.

The Yucaipa Valley Water District Capital Improvement Program is a planning tool used to identify projects and their corresponding costs. This program is necessary to provide for the orderly replacement and expansion of existing facilities; the construction of new facilities; and the development of project revenue and financing sources.

The Yucaipa Valley Water District Capital Improvements Program is a blueprint for planning the capital expenditures by coordinating planning, financial capacity and physical infrastructure construction.

The Capital Improvement Program is composed of two parts -- a capital budget and a capital program. The capital budget is the upcoming year's spending plan for capital items. The capital program is a plan for capital expenditures that extends five years beyond the capital budget.

Capital Improvement Program Summary

The Yucaipa Valley Water District Fiscal Year 2013 Capital Improvement Program identifies those proposed projects to be undertaken by the District to improve services, upgrade facilities and replace physical plants. This report contains a summary of those projects. It should be noted that the cost estimates should only be used as a general guide. Actual costs may vary greatly based on such factors as when the project is built, specific design considerations, environmental mitigation, and actual construction bids.

Substantial financial resources will be needed to carry out the Capital Improvement Program. Revenue and expenditures over the next five-year period need to be reviewed in order to determine the District's ability to implement the Capital Improvement Program.

Criteria for Prioritizing Capital Improvement Projects

Capital Improvement Projects will be evaluated and prioritized by being placed into one of three categories. The three categories are as follows:

- **Critical**
 - ▶ Reduce Dependency on Imported Water
 - Well Construction
 - Maximize Local Water
 - Recycled Water Development
 - ▶ Regulatory Requirements
 - ▶ Contractual Obligations
- **Important**
 - ▶ Community Needs
 - ▶ Minimization of Operational Costs
 - ▶ System Reliability
- **Necessary**
 - ▶ Future Growth

Capital Improvement Categories

The District currently maintains several separate categories to better define capital improvement projects. These categories are used primarily to identify internal funding sources, but such categories can also be useful for assessing the importance of a particular project.

The District uses the following categories:

- Contractual Obligations
- Land Acquisition
- Recycled Water System Improvements
- Regulatory Requirements
- Wastewater System Improvements
- Wastewater Treatment Facility Construction/Improvements
- Water Source of Supply
- Water System Improvements
- Water Treatment Facility Construction/Improvements
- Water Well Construction

Purpose of Capital Improvement Program

By establishing the Capital Improvement Program, it becomes clear that the District must maximize revenue sources to support the construction of required facilities. The District's ability to obtain long-term financing for the Capital Improvement Program is largely dependent on the financial strength and revenue stream of the District. To keep this high investment grade rating for future projects, the District must maintain adequate fee structures and reserve funds.

Finally, it is imperative that the operating costs of the water, wastewater and recycled water divisions remain fully self-supported by user fees in order to maximize other revenue sources for support of the Capital Improvement Program.

In the Fiscal Year 2013 Operating Budget, the water, wastewater and recycled water divisions receive property taxes that are used to fund depreciation/reserves. This is consistent with a fiduciary approach that invests heavily in the replacement of aged infrastructure instead of subsidizing water and wastewater rates. This approach will continue to make the water, wastewater and recycled water operating funds self sufficient while investing in improving the efficiency of the District while providing for the orderly replacement and expansion of existing facilities. This fiduciary philosophy of investing in the replacement of old infrastructure greatly enhances the overall value of the District while improving the quality of life for our customers.

YUCAIPA VALLEY WATER DISTRICT CAPITAL IMPROVEMENT PROGRAM

Division: Water **Project Priority:** Important/Critical
Category: Water Source of Supply/Regulatory **Construction Year:** FY 2015
Project Title: Nanofiltration Membrane Replacement Project - YVRWFF

Proposed Capital Improvement Project Funding by Fiscal Year (\$ in 000)							
Prior Year(s)	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	Future Periods	Total Project
				\$500			\$500

Total \$ 500,000

FUNDING SOURCE

Reserves/Depreciation \$ 500,000
 Development Impact Fees
 Federal Participation
 State Participation
 Bond Financing
 Local Matching
 Other Funds

Total \$ 500,000

Description:

The Yucaipa Valley Water District will be replacing the nanofiltration membranes this year to improve performance and ensure disinfection byproducts are efficiently removed from the drinking water supply

Justification:

This project is necessary to maintain efficient operations at the Yucaipa Valley Regional Water Filtration Facility and meet compliance requirements for disinfection byproduct control.

YUCAIPA VALLEY WATER DISTRICT CAPITAL IMPROVEMENT PROGRAM

Division: Water **Project Priority:** Necessary
Category: Water Storage **Construction Year:** FY 2010
Project Title: 6.0 MG Reservoir R-12.4 – Design and Construction

Proposed Capital Improvement Project Funding by Fiscal Year (\$ in 000)							
Prior Year(s)	FY 2012	FY 2013	FY 2014	FY 2015	FY 2016	Future Periods	Total Project
				\$8,250			\$8,250

Reserves/Depreciation \$ 100,000
 Development Impact Fees
 Federal Participation
 State Participation
 Bond Financing
 Local Matching
 Other Funds

Total \$ 100,000 Total \$ 100,000

Description:

The District staff will be preparing a master plan assessing the needs for improved biosolids management at the Wochholz Regional Water Recycling Facility. This assessment will be presented at future board workshops with an anticipated request to schedule appropriate funding for facility improvements.

Justification:

This planning project is expected to provide an alternative to the current belt presses and improve gas production to reduce energy costs.
